

NATURTINT®

Crème

Root Retouch

PERMANENT HAIR COLOUR
100% GREY COVERAGE

WHICH IS THE RIGHT SHADE FOR ME?

- **Black:** Suitable for root application on hair that has been previously coloured with Naturtint® 1N or 2N.
- **Dark Brown:** Suitable for root application on hair that has been previously coloured with Naturtint® 2N or 3N.
- **Light Brown:** Suitable for root application on hair that has been previously coloured with Naturtint® 4N, 4G, 5N, 5G or 5.7. Not suitable for copper, red, or intense shades.
- **Dark Blonde:** Suitable for root application on hair that has been previously coloured with Naturtint® 6N, 6G, 6.7, 7N or 7G. Not suitable for copper, red or intense shades, or hair darker than a level 4.
- **Light Blonde:** Suitable for root application on hair that has been previously coloured with Naturtint® 8N, 8G, 9N or 10N. Not suitable for copper, red or intense shades, or hair darker than a level 6.

THIS BOX CONTAINS

A NATURTINT® ROOT RETOUCH HAIR COLOURANT 15 ml e

Free from ammonia and enriched with active-plant based ingredients, to care for hair during colouring. Contains Toluene-2,5-Diamine Sulfate (see website for more information).

B NATURTINT® COLOUR DEVELOPER 15 ml e

Gently enables the colourant to penetrate deeply into the hair, giving long lasting permanent colour. Contains Hydrogen Peroxide (see website for more information).

C NATURTINT® PROTECTIVE CONDITIONER 15 ml e

Made with a high percentage of natural origin ingredients to help detangle the hair, protect it against damage and prolong the colour.

D PROTECTIVE GLOVES

To protect your hands from staining during the colouring process. You will find the gloves attached to this instruction leaflet.

E MIXING BOWL AND PRECISION BRUSH APPLICATOR

To easily mix and apply the hair colour.

F INSTRUCTION LEAFLET

Please read the instructions for use carefully.

SAFETY INSTRUCTIONS: READ AND FOLLOW THE INSTRUCTIONS BEFORE USE. CAUTION: HAIR COLOURANTS CAN CAUSE SEVERE ALLERGIC REACTIONS.

IMPORTANT:

Contains phenylenediamines (toluenediamines) and hydrogen peroxide.

This product is not intended for use on persons under the age of 16. Temporary "black henna" tattoos may increase your risk of allergy. The ratio for mixing colourant and the developer must always be 1:1.

DO NOT COLOUR YOUR HAIR IF:

- You have a rash on your face or sensitive, irritated and damaged scalp.
- You have ever experienced any reaction after colouring your hair.
- You have experienced a reaction to a temporary "black henna" in the past.

SKIN SENSITIVITY TEST:

ANY COSMETIC PRODUCT CAN CAUSE AN UNEXPECTED ALLERGIC REACTION AND, FOR THIS REASON, A SKIN SENSITIVITY TEST MUST BE CARRIED OUT BEFORE EACH AND EVERY USE, FOR 48 HOURS, BEFORE COLOURING YOUR HAIR - EVEN IF YOU ARE A REGULAR USER OF HAIR DYES. If your scalp is irritated, or you have damaged or broken skin, do not complete the skin sensitivity test and do not colour your hair until your scalp is fully healed. Be aware that even if a sensitivity test has been carried out you may still experience an allergic reaction when you colour your hair. The sensitivity test is an important precaution but it is not a guarantee to avoid future allergic reactions.

HOW TO PERFORM A SKIN SENSITIVITY TEST:

1. Remove any earrings. Cleanse a small area (1-2 cm) of skin behind your ear and on your inner elbow and dry gently.
2. Put on the gloves provided and carefully unscrew the caps from the **Colourant (A)** & the **Colour Developer (B)** bottles.
3. In a plastic bowl, using plastic utensils, mix a small amount (in equal measures) of the **Colourant (A)** & the **Colour Developer (B)** until totally blended. Do not use a metal bowl or metal utensils. Reseal both bottles immediately to preserve the contents ready for full application 48 hours later.
4. Using a cotton bud, apply the mixture to the cleansed area behind your ear and on your inner elbow and allow it to dry.
5. Then apply 2 more layers, each time allowing the areas to dry in between.
6. Leave the test mixture on the skin for at least 48 hours without washing, covering or touching the test area.
7. If you experience any signs of a reaction, such as swelling, redness, blistering, rash or itching, in or around the test area, you are sensitive to one or more of the ingredients within the formula - RINSE IMMEDIATELY AND DO NOT USE THIS PRODUCT ON YOUR HAIR.

SPECIFIC CAUTIONS:

If you experience a reaction during the application, such as stinging, burning, irritation or a rash on the scalp, rinse immediately and discontinue use. If you experience difficulty breathing, a rapidly-spreading skin rash, dizziness, faintness, and/or swelling to the eyes/face, seek immediate medical attention. Consult a doctor before colouring your hair again.

- Keep out of reach of children.
- Always wear the gloves that are provided.
- Avoid contact with eyes. Rinse immediately with plenty of water if the product comes into contact with eyes. Visit your doctor if irritation persists. (If you wear contact lenses, remove them before rinsing).
- This product is designed to only be used on the scalp area. Do not use it to dye eyelashes or eyebrows, or any other areas, such as facial hair.
- Avoid unnecessary contact with the skin.
- Do not inhale or ingest the product.
- Prepare and apply the mixture in a well-ventilated area.
- If your hair has been permed, bleached or relaxed recently, wait at least 2 weeks before applying Naturtint® Root Retouch.
- Always perform the colour strand test to confirm whether the desired results will be achieved.
- Seek medical attention if, during the days following application, you experience itching, redness, spots, swelling, blisters and/or oozing of the eyes, face and/or scalp.
- Consult with your doctor any questions regarding your specific sensitivity to hair colour.
- We recommend using Naturtint® Root Retouch 15 days after applying your regular colour, when the roots are visible but still short. Apply primarily along the hairline around the face, parting and temples.
- Naturtint® can be used if your hair has been previously dyed using henna or progressive colour, but only after the colour has completely grown out or been removed.

COLOUR STRAND TEST

Your final colour result will depend on the colour, thickness and overall condition of your hair. To ensure you will be pleased with your Naturtint® colour, we advise you to carry out a colour strand test to identify your expected final colour result and the development time required to achieve it.

HOW TO PERFORM A COLOUR STRAND TEST:

1. Use the same mixture you prepared for your skin sensitivity test.
2. Cut a small section of your hair from the root (approximately 3cm wide) and, wearing the gloves provided, completely cover with the mixture. TIP: secure the strands of hair at one end with some sticky tape.
3. Rinse the hair clean after 10 minutes. In the case of stubborn grey, or to achieve a more intense colour, leave the mixture for a further 5-10 minutes.
4. Gently dry the section of hair to reveal your colour result, remembering to take a note of your hair's specific development time.

STEP 1: PREPARE AND MIX UP YOUR COLOUR

Ensure your hair is dry and clean, as a build-up of styling products can affect your colour result. We recommend colouring your roots the day after washing, to allow some of the scalp's natural oils to be produced. This will further help protect your scalp during colouring. Comb your hair before application, leaving the roots visible: top part, crown, temples, depending on the hairstyle. **Always wear the gloves provided and ensure you have all the utensils you may need to hand.**

1. Protect your shoulders with a **towel** to prevent accidental staining of your clothes. You may also wish to protect the immediate surrounding area, especially any carpets or fabric, as permanent staining may occur if colour mixture is accidentally spilt.

2. **Put on the gloves** provided and keep them on during the whole colouring process.

3. Unscrew the caps of both the **Colourant (A)** and **Developer (B)** and pour or squeeze out the total contents into the mixing bowl. Mix using the applicator brush for 2 minutes until totally blended.

STEP 2: APPLY YOUR COLOUR

1. Apply the mixture to your roots using the applicator brush, ensuring the hair is completely covered. **Do not massage the product through the rest of the hair.**

2. Leave the mixture to develop for 10 minutes (20 minutes if you have stubborn grey).

STEP 3: RINSE AND CONDITION

1. Once you have reached your desired development time, **using gloved hands**, gently massage your hair whilst thoroughly rinsing it with warm water until the water runs clear.

2. Cleanse your hair with your regular shampoo to ensure all hair colour is removed, then gently squeeze excess moisture from your hair.

3. Then apply Naturtint® **Protective Conditioner** to help detangle your hair, add strength and boost shine. Gently massage through from the roots to the tips. Leave for 2-5 minutes then rinse thoroughly. Dry and style as normal!

AFTERCARE

To continue to care for and protect your hair, use Naturtint's full range of aftercare and styling products which have been specifically developed for coloured hair.

NATURTINT® COLOUR FIXING SHAMPOO

A frequent-use shampoo for coloured, dry and damaged hair. Formulated with naturally-derived cleansers and Rock Rose and Lemon Fruit Waters to help strengthen and rejuvenate your hair, leaving it moisturised, repaired and nourished - for a long lasting colour and shine.

NATURTINT® COLOUR FIXING PROTECTIVE CONDITIONER

A highly concentrated frequent-use conditioning treatment for coloured, dry and damaged hair. Formulated with Organic Shea Butter and Sunflower Seed extract to give natural strength to your hair - for a long lasting colour and shine.

NATURTINT® ANTI-AGEING CC CREAM

A leave-in intensive anti-ageing and restorative treatment. Naturtint's Anti-Ageing CC Cream helps to combat the main signs of hair ageing and protect your hair from damage, heat, UV and pollution. Your hair's natural keratin is restored, leaving it strong and full of shine. Hair looks and feels younger and your colour lasts longer.

NATURTINT® HAIRSPRAY

Formulated with natural origin ingredients including Baobab and Sunflower Seed extracts that fix the hair giving flexible style and vibrant shine, whilst reducing frizz. Effective non-tacky hold without build up! 99% natural origin ingredients, non-aerosol and certified COSMOS Natural by ECOCERT.

NATURTINT® DRY SHAMPOO

Extend the time between hair washes with Naturtint® Dry Shampoo, which contains natural origin ingredients such as Rice and Barley Starch that absorb excess oil, freshening hair and adding texture and volume. 100% natural origin ingredients and certified COSMOS Natural by ECOCERT.

NATURTINT® STYLING FOAM

Add bounce and vitality to your hair with Naturtint's Styling Foam, enriched with natural origin conditioners. Volumise and hold as well as protect against split ends and guard against colour fade. 99% natural origin ingredients, non-aerosol and certified COSMOS Natural by ECOCERT.
